A new book to help senior executives and boards get smart about risk management The ability of businesses to survive and thrive often requires unconventional thinking and calculated risk taking. The key is to make the right decisions—even under the most risky, uncertain, and turbulent conditions. In the new book, Surviving and Thriving in Uncertainty: Creating the Risk Intelligent Enterprise, authors Rick Funston and Steve Wagner suggest that effective risk taking is needed in order to innovate, stay competitive, and drive value creation. Based on their combined decades of experience as practitioners, consultants, and advisors to numerous business professionals throughout the world, Funston and Wagner discuss the adoption of 10 essential and practical skills, which will improve agility, resilience, and realize benefits: Challenging basic business assumptions can help identify “Black Swans” and provide first-mover advantage Defining the corporate risk appetite and risk tolerances can help reduce the risk of ruin. Anticipating potential causes of failure can improve chances of survival and success through improved preparedness. Factoring in velocity and momentum can improve speed of response and recovery. Verifying sources and the reliability of information can improve insights for decision making and thus decision quality. Taking a longer-term perspective can aid in identifying the potential unintended consequences of short-term decisions.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

This book gathers papers presented at the International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD-2018), which was held in Tangiers, Morocco on 12–14 July 2018. In addition to the latest research in the field of energy, it offers new solutions, tools and effective techniques, and provides essential information on smart grids, renewable and economical energy. Further, it addresses modeling, storage management and decision support in the field of energy, offering a valuable guide for researchers, professionals and all those who are interested in the development of advanced intelligent systems in the energy sector.

Every year, thousands of people across the UK train to be a life, business or executive coach, yet many struggle to make a living. If they don't have the skills to run a successful business, they won't be able to create the business they need. In this book, you will discover 10 easy-to-follow steps to create your own successful business.

Ann Larkin Hansen offers expert advice on everything from scythes to disc mowers, and details the pros and cons of using horse power or tractors. You'll learn how to choose the right species for your soil, judge hay quality to buy or sell, and determine how many bales your animals need to stay happy, healthy, and energetic.

This paper reviews economic developments in Suriname during 1994–96. In 1995, there was a major turnaround in Suriname's economic and financial situation following the expansionary fiscal and monetary policies pursued in the first half of the 1990s and the political and economic disruptions of the 1980s. The marked improvement was owing to the restoration of financial discipline, a strengthening of international bauxite prices, and the unification and subsequent stabilization of the exchange rate. The inflation fell further to less than 1 percent in 1996.

A workbook on descriptive and subject cataloguing featuring practical examples and suggested solutions to reinforce theoretical concepts and practical application in descriptive cataloguing (using Anglo-American Cataloguing Rules, 2nd ed., 1998 rev.), bibliographic classification (using Dewey Decimal Classification, 21st ed.) and assigning subject headings (using Sears List of Subject Headings, 17th ed.). Includes examples for both manual and computerised creation of bibliographic records, thus preparing students for both automated and manual library and information service (LIS) environments While the workbook uses Anglo-American Cataloguing Rules, Dewey Decimal Classification and Sears List of Subject Headings as tools for information organisation, the major objective is to develop skills in information management and organisation While the workbook is likely to be predominately used in the instruction of first level library and/or information studies programmes offered by higher education institutions, it could very well be used in the LIS work environment

"One icy winter's evening in Budapest, a man runs straight into John Taylor as he walks home through the narrow streets. John falls over into the snow and looks up at the man's face. 'I felt very afraid. Because what I saw was me. My face looking down at me. My mouth saying sorry.' Who is the man, and how will John's life change?"
