Written for students without knowledge of linguistics and unfamiliar with "traditional" grammar, this text concentrates on providing a much needed foundation in Standard English in preparation for more advanced work in theoretical linguistics.

Provides psychological and psychiatric insight to criminal behavior by exploring criminology as a science and the human mind in relation to crime. Specifically addresses heredity and environment as causes of crime, and juvenile and war delinquency.

I found this up-to-date factual book to be well-written and relatively concise...Its easy readability will make it both appealing and useful for students, trainees, and experts. -- PMFA News ...there are 80 aesthetic and reconstructive oculoplastic videos, 30 of which are new, which makes this a one-of-a-kind video library. What I liked about the videos, especially the new ones, is the high quality, clarity, and details of technique provided by the authors who do the voiceovers themselves. -- Plastic and Reconstructive Surgery
FIRST PRIZE from the BMA Medical Book Awards for Surgical Specialties! Eyelid & Periorbital Surgery offers expansive coverage of aesthetic and reconstructive procedures in oculoplastic surgery. Oculoplastic and plastic surgeons combine their talents in this unique two-volume clinical resource that features comprehensive guidance for solving both common and rare eyelid and periorbital problems. additional 13 new chapters, including topics ranging from nonsurgical periorbital rejuvenation to male blepharoplasty. Best of all, there are more than 30 new surgical videos demonstrating the latest surgical techniques. Also included is a complimentary eBook. Divided into 5 sections, the book begins by covering the fundamentals including periorbital and eyelid anatomy, eyelid function, innervation, biomechanics, and tissue grafts. The following section discusses aesthetic surgery including procedures such as brow lift, upper and lower blepharoplasty, midface lift, treatment of malar bags and festoons, lateral canthal dysfunction, and management of chemosis. A new section has been added on aesthetic nonsurgical state-of-the-art periorbital treatments with an update on injectable fillers, botulinum toxin injections, and fat grafting. The reconstructive surgery section covers ptosis surgery, upper and lower eyelid reconstruction, entropion and ectropion reconstruction, surgery for facial paralysis, malignant eyelid tumors, Graves' disease, and the treatment of pediatric patients. The new final section covers orbital and lacrimal surgery including blowout fracture of the orbital floor, neuroophthalmologic injuries, evisceration and enucleation, late repair of orbital fractures, and management of the lacrimal system. Step-by-step descriptions and detailed videos provide a wide variety of tips, clinical pearls, and personal insights from the authors making this an invaluable resource for surgeons interested in the topic.

THIS EDITION HAS BEEN REPLACED BY A NEWER EDITION From about 1880 to World War I, sweeping changes in technology and culture created new modes of understanding and experiencing time and space. Stephen Kern writes about the onrush of technics that reshaped life concretely--telephone, electric lighting, steamship, skyscraper, bicycle, cinema, plane, x-ray, machine gun-and the cultural innovations that shattered older forms of art and thought--the stream-of-consciousness novel, psychoanalysis, Cubism, simultaneous poetry, relativity, and the introduction of world standard time. Kern interprets this generation's revolutionized sense of past, present, and future, and of form, distance, and direction. This overview includes such figures as Proust Joyce, Mann, Wells, Gertrude Stein, Strindberg, Freud, Husserl, Apollinaire, Conrad, Picasso, and Einstein, as well as diverse sources of popular culture drawn from journals, newspapers, and magazines. It also treats new developments in personal and social relations including scientific management, assembly lines, urbanism, imperialism, and trench warfare. While exploring transformed spatial-temporal dimensions, the book focuses on the way new sensibilities subverted traditional values. Kern identifies a broad leveling of cultural hierarchies such as the Cubist breakdown of the conventional distinction between the prominent subject and the framing background, and he argues that these levelings parallel the challenge to aristocratic society, the rise of democracy, and the death of God. This entire reworking of time and space is shown finally to have influenced the conduct of diplomacy during the crisis of July 1914 and to havestructured the Cubist war that followed.
