injectable drugs. The tenth edition of this invaluable reference has grown to cover 238 drugs commonly used in the treatment of infants and children, including 20 new to this edition.

A point-of-care dosing resource for medical professionals managing pediatric and neonatal patients. It includes more than 990 drug monographs offering concise fields of information specific to neonates and children. It follows a dictionary-like format, with drug products alphabetically organized and cross-referenced by US and Canadian brand names.

Structured to be a companion to the recently published Handbook of Transfusion Medicine, the Handbook of Pediatric Transfusion Medicine is dedicated to pediatric hematology-oncology and transfusion medicine, a field which remains ambiguous and which has generated few comprehensive texts. This book stands alone as one of the few texts that addresses transfusion issues specific to pediatric medicine. Written in an eminently readable style, this authoritative handbook is a requirement for any pediatric physician or caregiver. Neonatal and fetal immune response and in utero development issues Blood compatibility and pre-transfusion testing issues specific to pediatric and neonatal transfusion Therapeutic apheresis including red blood cell exchange and prophylactic chronic erythrocytapheresis for sickle cell patients Also includes a section that concentrates on the consent, quality and legal issues of blood transfusion and donation
