A physical inventory count is the practice of counting your retail products in person. The process typically involves a retail staff member (or team of workers) going through the retailer's sales floor and stock room and counting each item. The data is then recorded either manually, using pen and paper or electronically using a mobile device.

The Physical Inventory Procedures for General Support Unit (GSU) and Direct Support Unit (DSU) Supply Echelons Study has found that current publications dealing with the subject of physical inventory procedures lack comprehensiveness and in some instances are inconsistent. A set of

File Type PDF Physical Inventory Procedures Manual

comprehensive physical inventory procedures have been developed and are recommended for implementation. The procedures have been written in detail but in such a manner as to be applicable to all GSU/DSU systems in general. The recommended procedures are designed to serve as a base for the development of physical inventory procedures for ongoing systems such as the manual system, DSU/GSU NCR-500 system, and the Division Logistics (DLOGS) system as well as for future automated supply and accounting systems.
