Reactions to the unanimous Supreme Court judgment in *Cherry/Miller (No 2)* [2019] UKSC 41 have been as strong as they have been diverse. On one analysis — including, arguably, the Court's own — the judgment amounts to nothing more than an affirmation and application, albeit in a politically fraught context, of orthodox constitutional law.

Public No More examines the quickly changing environment within higher education, including the permanent decline in state support for public universities. This book raises the question of how research universities can survive with reduced subsidies and increased competition from both non-profit and growing for-profit institutions. Authors Gary C. Fethke and Andrew J. Policano, both longtime university administrators, offer a strategic framework for determining how tuition and access should be set and how universities should decide on quality and program scope. Throughout the text, real-world examples illustrate successful and unsuccessful adoptions of the authors' proposals. Leadership within public higher education, policymakers, and researchers alike will find Public No More to be a sober and well-grounded guide to what lies ahead for universities across the nation.

The New Public Service: Serving, not Steering provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. It is organized around a set of seven core principles: (1) serve citizens, not customers; (2) seek the public interest; (3) value citizenship and public service above entrepreneurship; (4) think strategically, act democratically; (5) recognize that accountability isn't simple; (6) serve, rather than steer; and (7) value people, not just productivity. The New Public Service asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important, and meaningful about public service and considers how we might better live up to those ideals and values. The revised fourth edition includes a new chapter that examines how the role and significance of these New Public Service values have expanded in practice and research over the past 15 years. Although the debate about governance will surely continue for many years, this compact, clearly written volume both provides an important framework for a public service based on citizen discourse and the public interest and demonstrates how these values have been put into practice. It is essential reading fo students and serious practitioners in public administration and public policy.

A powerful, hopeful critique of the unnecessary death spiral of higher education, *The Great Mistake* is essential reading for those who wonder why students have been paying more to get less and for everyone who cares about the role the higher education system plays in improving the lives of average Americans.

George-Warren offers the first serious biography in which Gene Autry the legend becomes a flesh-and-blood man--with all the passions, triumphs, and tragedies of a flawed icon.

The institutional ethnographies collected in *Under New Public Management* explore how new managerial governance practices coordinate the work of people doing front-line work in public sectors such as health, education, social services, and international development, and people management in the private sector. In these fields, organizations have increasingly adopted private-sector management techniques, such as standardized and quantitative measures of performance and an obsession with cost reductions and efficiency. These practices of "new public management" are changing the ways in which front-line workers engage with their clients, students, or patients. Using research drawn from Canada, the United States, Australia, and Denmark, the contributors expose how standardized managerial requirements are created and applied, and how they affect the practicalities of working with people whose lives and experiences are complex and unique.
