This volume contains the papers presented at the 15th International Conference on Logic for Programming, Arti?cial Intelligence, and Reasoning (LPAR) held November22-27inDoha,QataronthepremisesoftheQatarcampusofCarnegie Mellon University. In its 15th edition, LPAR looked back at a rich history. The conference evolved out of the First and Second Russian Conferences on Logic Progr- ming, held in Irkutsk, in 1990, and aboard the ship "Michail Lomonosov" in 1991. The idea of organizing the conference came largely from Robert Kowalski, who also proposed the creation of the Russian Association for Logic Progr- ming. In 1992, it was decided to extend the scope of the conference. Due to considerableinterestinautomatedreasoningintheformerSovietUnion,thec- ference was renamed Logic Programming and Automated Reasoning (LPAR). Under this name three meetings were held during 1992-1994: again on board the ship "Michail Lomonosov" (1992), in St. Petersburg, Russia (1993), and on board the ship "Marshal Koshevoi" (1994). In 1999, the conference was held in Tbilisi, Georgia. At the suggestion of Michel Parigot,the conference changed its nameagain toLogicforProgrammingandAutomatedReasoning(preservingthe acronym LPAR!) re?ecting an interest in additional areas of logic. LPAR 2000 was held on Reunion Island, France. In 2001, the name (but not the acronym) changed again to its current form. The 8th to the 14th meetings were held in the following locations: Havana, Cuba (2001) Tbilisi, Georgia (2002); Almaty, Kazakhstan(2003);Montevideo,Uruguay(2004);MontegoBay,Jamaica(2005); Phnom Penh, Cambodia (2006); and Yerevan, Armenia (2007).

Lanzkowsky's Manual of Pediatric Hematology and Oncology, Sixth Edition, is a comprehensive book on patient management, replete with algorithms and flow diagrams on diagnosis and management. Reflecting the considerable advances in the treatment and management of hematologic and oncologic diseases in children, the sixth edition of this successful clinical manual has been entirely updated to incorporate all current treatment protocols, new drugs, and management approaches. Its concise and easy-to-read format will enable readers to make accurate diagnoses and permit them to treat patients without having to reference larger medical textbooks. Based on the new standards of genetic classification and prognostic information that have arisen in the past five years, the sixth edition includes two new

chapters (Diagnostic, Molecular, and Genomic Methodologies for the Hematologist, Transfusion Medicine) and several new expanded chapters that were previously sections in consolidated chapters (Myelodysplasia, Myeloid Leukemias, Lymphoid Leukemias, Hemolytic Anemia, and Disorders of Coagulation). Presents a concise, systematic approach to all pediatric hematologic and oncologic disorders in one manual Offers an alternative to bigger references which only cover either oncologic or hematologic disorders in twice as many pages Presents an easy-to-read format: multiple tables, charts, and flow-diagrams for diagnosis and management of pediatric hematologic and oncologic disorders Includes 2 new chapters and several expanded chapters: Diagnostic, Molecular and Genomic Methodologies for the Hematologist, Transfusion Medicine, Myelodysplasia, Myeloid Leukemias, and Lymphoid Leukemias
