Delivering a tactical plan, complete with both downloadable and online support, Chris McIntyre rescues small business owners trapped in potholes littering the road to success, and provides a helping hand to freedom. Uniquely prepared to create and deliver their product or service, small business owners are far less equipped to effectively lead, let alone develop, their team. Their internal systems and processes are often informal and incomplete, limiting their freedom and their business growth. McIntyre provides a step-by-step, customizable solution to overcome this roadblock. Coached by McIntyre, leaders learn to craft the right team, create a consistent core message that enables the brand, and then, connect the two. Business owners are given a rock-solid process for attracting and keeping superstars, and dropping nightmares. They learn how to get their core message out of their head and into the heads of their superstar team. Supported by McIntyre, organizational leaders will define their core mission, and develop a distinct, systematic formula that enables their team to accomplish it. Leaders are aided with a thorough checklist to guide implementation, giving them everything they need for consistent performance from their team and ongoing success.

When Gila was growing up, her life was predictable and success was quantifiable. From kindergarten through college, there was a clear path toward success. Then when grad school took her from classwork to fieldwork, life began to get more complicated, and she discovered that the real world does not offer the structure and support that her academic training provided. As Gila begins her journey into adulthood in her twenties, new questions and challenges arise: What lies ahead? What happened to all that positive feedback she received as a kid? How can she learn to trust her intuition? Is she in control of her destiny? In *The Roadmap Ends Here*, Gila presents a personal narrative of the lessons she learned along the way: that life takes work, that things often don't go as planned, that there's always more to learn, and that there's a silver lining in the realization that even though she cannot fully predict where life is taking her, she is on the right path.

Having retired early in life at the age of 45, back in the late 80's, has been very advantages to me. It gave me the time to devote many thousands of hours to this project and it should be very beneficial to you, as a reader. This book illustrates what has worked very profitably for me in the past and continues to work profitably to this day. In this book, there are

valuable tips and some good sound financial and fundamental information. As President of three Corporations and three companies, from 1965 to present day, it has kept me quite busy over time. In the 90's, as Owner, Producer, Director, and Host of a popular Radio Travel Show in southwest Florida, I was quite content. At the time, I felt I had done quite a bit in my life, but I also felt one project was missing. I had been asked many times, how I retired so young, and how I achieved my success in life. So one day in 2004, I said to myself why not sit down and write about it, hence this book. I do say at times, I am really in semi-retirement, very busy having fun. This book was written with good intentions, morals, and family values. As you read on, it is for all to enjoy, from ages 9 to 90. "Early Retirement: A Road Map to Success is a timeless book."

Artificial Intelligence for Business: A Roadmap for Getting Started with AI will provide the reader with an easy to understand roadmap for how to take an organization through the adoption of AI technology. It will first help with the identification of which business problems and opportunities are right for AI and how to prioritize them to maximize the likelihood of success. Specific methodologies are introduced to help with finding critical training data within an organization and how to fill data gaps if they exist. With data in hand, a scoped prototype can be built to limit risk and provide tangible value to the organization as a whole to justify further investment. Finally, a production level AI system can be developed with best practices to ensure quality with not only the application code, but also the AI models. Finally, with this particular AI adoption journey at an end, the authors will show that there is additional value to be gained by iterating on this AI adoption lifecycle and improving other parts of the organization.

Although communities feel magical, they don't come together by magic. Get Together is a guide to cultivating a community-people who come together over what they care about. Whether starting a run crew, helping online streamers connect with fans, or sparking a movement of K-12 teachers, the secret to community-building is the same: don't fixate on what you can do for people (or what they can do for you). Instead, focus on what you can do with them. In Get Together, the People & Company team provides stories, prompts, and principles for each stage of cultivating a passionate group of people. Every organization holds the potential to build and sustain a thriving community. Get Together shows readers how companies and customers, artist and fans, or organizers and advocates, can join forces to accomplish more together than they could have alone.
