An autobiography usually recounts the life of a person who has achieved wide acclaim in one field. But this extraordinary book describes the life of someone who has achieved international acclaim in "three" fields! Ervin Laszlo was a child prodigy on the piano and grew up to become an internationally celebrated virtuoso. By the time he reached his 40s, however, he had become a famous scientist and philosopher, and had written a dozen books and more than a hundred articles. He also taught at major universities in Europe, the U.S., and the Far East. Shortly thereafter, he gained world renown as a global visionary, heading research programs at the United Nations and founding an international think tank (the Club of Budapest). But this book is "not" an autobiography in the traditional sense. In Laszlo's own words: "I don't like talking about myself, about what makes me tick and why. Writing about all the things that have happened to me is different. This is storytelling--the telling of a real, lived story: my story, as it unfolded over the years." "She believed it was a gift to never truly know the self. We are not who we think we are, nor how others see us. Long before death, we die a thousand times at the hands of a definition." Through characters including an eccentric film director, an aging Cockney bodyguard, the teenage child of Nigerian immigrants, a divorced amateur magician from New Jersey, and a Beijing street vendor who becomes an overnight billionaire, *Tales of Accidental Genius* contemplates individuals from different cultures, races—rich and poor, young and old—and reveals how faith and yearning for connection helps us all transcend darkness of fear and misfortune.
