Spinal disorders in very young children may be caused by a variety of conditions. The treatment of such conditions is often challenging due to the age of the patient and the progressive nature of the deformity. There also may be associated problems such as congenital anomalies, respiratory insufficiency, and neurological problems. Depending on the etiology of the deformity, these children

are often cared for by multiple specialists including pediatricians, pediatric orthopaedists or orthopaedic spine surgeons, neurologists, pediatric surgeons, pediatric neurosurgeons, oncologists, and/or pulmonologists. Health professionals in all of the mentioned disciplines are involved in the management of these patients, which is why compiling a comprehensive textbook that is not limited to orthopedic specialists is essential. This textbook will effectively help to standardize the care of these patients. Furthermore, other professionals such as nurses, physical therapists and healthcare professionals in training are usually not familiar with these conditions and are in need of a reference book to consult when caring for children with spinal deformities.

The Spine: Medical and Surgical Conditions is a complete, two volume, evidence based study edited by an internationally recognised team of spine surgeons based in the USA, China, Canada, Germany, Japan, Brazil, Egypt and India. The two volumes are divided into 137 chapters, across fourteen sections. The first section covers general topics in spinal medicine, including anatomy, biomechanics, physical and neurological examination, interventional diagnostics and therapeutics, and anaesthesia. This is followed by

This book offers a much-needed discussion on the targeting of biofilm-related infections. Chapters include discussions on the impact of biofilm on medical implants, industrial applications, as well as wound and tissue infections. It also offers discussions on regulatory management for industrial sectors and medical environments. Given that there continues to be a paucity of effective antimicrobial products, devices, and coatings in clinical and industrial use that effectively reduce rates of infection or biofilm-related problems, Targeting Biofilms in Translational Research,

This book analyses changes which have occurred in the organization and management of the UK public services over the last 15 years, particularly drawing on rich primary data from restructured NHS settings. The book argues that real change has occurred at the top of these organizations and that novel organizational 'hybrids' may be emerging.

Excerpt from The Management of Lateral Curvature of the Spine, Stooping, and the Development of the Chest in Phthisis One might almost say that lateral curvature of the spine is a symptom rather than a disease, for it is the result of a great many different conditions. Yet when the deformity is once established the affection assumes, whatever may be its cause, so definite a character that it

fairly claims the position of a distinct disorder. In dealing with lateral curvature, however, we must consider from a practical point of view the various steps which have led up to the deformity as we first see it, and we must not expect to be able to apply a specific kind of treatment which will meet the requirements of all cases alike. f k.
