The Workshop on the Economics of Information Security (WEIS) is the leading forum for interdisciplinary scholarship on information security, combining expertise from the fields of economics, social science, business, law, policy and computer science. Prior workshops have explored the role of incentives between attackers and defenders, identified market failures dogging Internet security, and assessed investments in cyber-defense. Current contributions build on past efforts using empirical and analytic tools to not only understand threats, but also strengthen security through novel evaluations of available solutions. Economics of Information Security and Privacy III addresses the following questions: how should information risk be modeled given the constraints of rare incidence and high interdependence; how do individuals' and organizations' perceptions of privacy and security color their decision making; how can we move towards a more secure information infrastructure and code base while accounting for the incentives of stakeholders?

The Panasonic G80, G85 in the USA, is the most capable version of their workhorse G series cameras to date. The heart of the camera is its menu system. It is one of the best presented and most logically laid out of any digital camera. But with pages of menus containing hundreds of settings the manual for the G80/85 is a formidable read. What's the difference between Self Timer and Shutter Delay? Between AFS and AFF? Between AdobeRGB and sRGB? Many photographers never fully get to grips with the G80/85. That needn't be you...

“A hero's tale of what’s possible when we unlock our potential, continue the search for knowledge, and draw on our lived experiences to guide us through the darkest moments.”—Stacey Abrams From a black, gay woman who broke into the boys’ club of Silicon Valley comes an empowering guide to finding your voice, working your way into any room you want to be in, and achieving your own dreams. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FORTUNE In 2015, Arlan Hamilton was on food stamps and sleeping on the floor of the San Francisco airport, with nothing but an old laptop and a dream of breaking into the venture capital business. She couldn’t understand why people starting companies all looked the same (white and male), and she wanted the chance to invest in the ideas and people who didn’t conform to this image of how a founder is supposed to look. Hamilton had no contacts or network in Silicon Valley, no background in finance—not even a college degree. What she did have was fierce determination and the will to succeed. As much as we wish it weren’t so, we still live in a world where being underrepresented often means being underestimated. But as someone who makes her living investing in high-potential founders who also happen to be female, LGBTQ, or people of color, Hamilton understands that being undervalued simply means that a big upside exists. Because even if you have to work twice as hard to get to the starting line, she says, once you are on a level playing field, you will sprint ahead. Despite what society would have you believe, Hamilton argues, a privileged background, an influential network, and a fancy college degree are not

prerequisites for success. Here she shares the hard-won wisdom she's picked up on her remarkable journey from food-stamp recipient to venture capitalist, with lessons like "The Best Music Comes from the Worst Breakups," "Let Someone Shorter Stand in Front of You," "The Dangers of Hustle Porn," and "Don't Let Anyone Drink Your Diet Coke." Along the way, she inspires us all to defy other people's expectations and to become the role models we've been looking for. Praise for *It's About Damn Time* "Reading Arlan Hamilton's *It's About Damn Time* is like having a conversation with that frank, bawdy friend who somehow always manages to make you laugh, get a little emo, and, ultimately, think about the world in a different way. . . . The book is warm, witty, and unflinching in its critique of the fake meritocracy that permeates Silicon Valley."—Shondaland
