STIHL's most advanced clearing saw ever, featuring the 'M-Tronic' system - fully electronic engine management which adjusts ignition timing and fuel metering in all operating modes. With ErgoStart and simplified starting, the low emission 2-MIX engine and a 4 point anti-vibration system, the FS 460 C-EM is the ideal choice for anyone with large areas of tough overgrown grass to maintain.

Covers models manufactured through 1998.

The Booker Prize-winning author of *Oscar and Lucinda* and *The Tax Inspector* now gives readers a hero, the malformed but ferociously wilful Tristan Smith, who becomes the object of the world's byzantine political intrigues, even as he attains stardom in a bizarre *Sirkus* that is part passion play and part *Mortal Kombat*.

The Intergovernmental Panel on Climate Change (IPCC) has recently summarized the state of the art in research on climate change (Climate Change 1995). The most up to date research findings have been divided into three volumes: □ the Science of Climate Change (working group I), □ the Impacts, Adaptation and Mitigation of Climate Change (working group II), and □ the Economic and Social Dimensions of Climate Change (working group III) There is a general consensus that a serious change in climate can only be avoided if the future emissions of greenhouse gases are reduced considerably from the business as usual projection and if at the same time the natural sinks for greenhouse gases, in particular that of CO₂, are maintained at the present level or preferably increased. Forests, forestry and forestry industry are important parts of the global carbon cycle and therefore they are also part of the mitigation potentials in at least a threefold way: 1. During the time period between 1980 and 1989 there was a net emission of CO₂ from changes in tropical land use (mostly tropical deforestation) of 2.6 ± 1 GtC/a, but at the same time it was estimated that the forests in the northern hemisphere have taken up 0.5 ± 0.5 GtC/a and additionally other terrestrial sinks (including tropical forests where no clearing took place) have been a carbon sink of the order of 1.3 ± 1.

This volume of Eurasian Studies in Business and Economics includes selected papers from the 22nd Eurasia Business and Economics Society (EBES) Conference in Rome. It presents original empirical research from several countries and regions including many developing economies such as Poland, Russia, Tunisia, Lebanon, Belarus, and Lithuania. Both the theoretical and empirical papers in this volume cover diverse areas of business and management from various regions. The main focus is on sharing the latest research results on evolving approaches to entrepreneurship research, behavioral aspects of entrepreneurship and SME development, and policy development. The volume also includes related studies that analyze international business cooperation, performance assessment, and a range of other current topics.

The Tactical Emergency Casualty Care Course Manual is the printed component for the NAEMTs 16-hour continuing education Tactical Emergency Casualty Care (TECC) Course. It may be used by both instructors and students as a resource to prepare for the TECC course and as a reference that discusses the current best practices for EMS providers to utilize in the response to and care of patients in a civilian tactical environment. The TECC Course does not offer certification as a tactical medic it is intended to teach all EMS providers the best patient care and safety practices in a civilian tactical environment, such as an active shooting hostile event. Composed of 10 lessons, The TECC Course Manual will: Cover the phases of care in a civilian tactical environment, Describe step-by-step the life-saving skills that may be performed in a civilian tactical environment, Provide safety and survival strategies for EMS providers and their patients In addition to the TECC Course Manual, instructors may also purchase the TECC Online Instructors Toolkit (9781284483888). This resource features 10 lesson presentations in PPT, as well as interactive patient simulations and skill stations that allow students to gain experience in a safe environment monitored by experienced EMS providers.

Many Americans dream about building their own home. With this book you can make those dreams a reality. As innovative and original as it was when first published in 1972, Ken Kern's The Owner-Built Home is an aspiring DIY homebuilder's bible. Finally, after years of demand, it is back in print for the next generation of owner-builders. The product of years of research and experimentation with innumerable design and construction techniques around the world, The Owner-Built Home is full of practical tips. It describes in refreshing, straight-forward language, everything involved in making a home. Fully illustrated with drawings, photographs, and plans, The Owner-Built Home is an indispensable tool for anyone planning to build a house. Readers interested in related titles from Ken Kern will also want to see: The Owner Builder's Guide to Stone Masonry (ISBN: 9781626545403), Owner Built Homestead (Emblem Editions) (ISBN: 9781626545441), The Owner Builder's Guide to Stone Masonry (ISBN: 9781626545403), Owner Built Homestead (Emblem Editions) (ISBN: 9781626545441).
