De Sunny & Tim verhalen hebben als doel kinderen op een begrijpelijke en toegankelijke manier uitleg te geven over de nucleaire geneeskunde. Eerder verschenen "Lichtjes in je lichaam" en "Wil jij de fotodokter helpen" waarin de stripfiguren Sunny en Tim laten zien hoe nucleair diagnostisch onderzoek wordt gedaan. In "Sam komt je helpen!" wordt met behulp van een nieuw karakter 'Sam' uitgelegd hoe behandelingen in de nucleaire geneeskunde werken. "Ronald van Rheenen, INVOLVED Doel van INVOLVED is kennis beschikbaar maken voor iedereen op zo'n manier dat het begrijpelijk en toepasbaar is voor mensen van alle leeftijden en intelligentie niveau's. Het initiatief heeft animaties, prentenboeken, informatiekaarten, first-person-video's en impressie foto's voorgebracht om patiënten te informeren over nucleaire en radiologische onderzoeken/therapieën. Hierdoor zijn zij beter geïnformeerd en meer in staat de regie te voeren over de zorg."

A hard-hitting, tour de force tale of the mob and the man who makes sure their rules are the only rules, by the American master of crime George V. Higgins. Jackie Cogan is an enforcer, and when the mob's rules get broken, Cogan is called in to take care of business. This time a high-stakes card game has been held up by an unknown gang of thugs. Calculating, ruthless, businesslike, and with a shrewd sense of other people's weaknesses, Cogan plies his trade, moving among a variety of hoods, hangers-on, and big-timers, tracking those responsible, and returning "law and order" to the lawless Boston underworld. Combining remarkable wit, crackling dialogue, and a singular ability to show criminal life as it is lived, George V. Higgins builds an incredible story of crime to an unforgettable climax.

Reflects philosophy of Model Curriculum Guide for the English-Language Arts (K-8).

In order to convey information regarding the workings of imaging techniques and therapies of Nuclear Medicine and Radiology to children and illiterate adults, specific attractive, understandable and accessible visuals are designed. Hereby (young) patients truly can become owner of their healthcare processes. These stories are available for free as public animations on YouTube as well as purchasable as picture books. The primary aim of Visual Patient Education is to make knowledge available to anyone in such a way that it is understandable and suitable for people of all ages and level of intelligence. In order to achieve this goal, knowledge is transferred using cartoon characters. At the same time, there is not one all-encompassing form of visual education. It is often a combination of imaging techniques that tell the entire story for each individual project.

The Goths—a rumored people first known by history around the river Vistula in present Poland—was the people that more than other contributed to the fall of the Roman Empire. It was however also the Goths who preserved the Roman culture against other Germanic tribes. Earlier it has been generally assumed the Goths originated in Scandinavia but during the 20th c. many scholars have grown skeptical. The author has, using both Classical and Nordic sources and supplementary sciences, made probable there is an intimate connection between the Goths and the Nordic countries. Consequently it is quite possible that at least part of the Goths have a Nordic origin. The book rests on the basic hypothesis that the Goths are not a people but a number of tribes and peoples united through a common religious/cultic origin. The old dispute concerning the relationship between Svear and Gautar also gets quite a new meaning. The book is interdisciplinary and embraces history, religion, arts, linguistics and archaeology. In 1999 Ingemar Nordgren received his Ph.D. at Odense University, Denmark. The book builds to a considerable extent on his dissertation but has been updated and partly rewritten with brand new material.

In this pioneering work, based upon interviews with many of the surviving protagonists, Cornelis ('Cees') Andriessse tells the story of the role that Dutch publishing houses played in the rise of English language commercial science publishing after the Second World War, that was preceded by the decline of science publishing in German. Using the existing literature as well as many privately held archival sources, the author follows the fortunes of

the leading publishers, Martinus Nijhoff, Elsevier and North Holland while also briefly discussing smaller houses like Dr. W. Junk and Reidel. The book contains lively portraits of the main characters involved and will no doubt stimulate further research and discussion of the role of publishing in the history of science. The authors' (TM) main thesis that successful publishing requires a strong, fruitful partnership between an academic publisher and an academic editor, will no doubt convince most readers. This is a great book on the most productive friendships and partnerships in the history of science publishing.

In this encyclopedia, two experienced world travelers and numerous contributors provide a fascinating worldwide survey of street foods and recipes to document the importance of casual cuisine to every culture, covering everything from dumplings to hot dogs and kebabs to tacos. • Presents an international survey of street foods in representative countries and regions that includes interesting facts and recipe to illustrate many of them • Supplies the historical and environmental background of the country's street food • Includes sidebars with fun facts and statistics about street foods • Provides highly useful information for students studying geography and for travelers
