In 1993, William J. Clinton began his eight year stint as forty-second president of the United States. A key figure of change in the Democratic Party, Clinton's political and personal actions ensured his lasting status as an important if controversial leader at a critical moment in recent American history. In *Bill Clinton: Building a Bridge to the New Millennium*, David H. Bennett traces Clinton's life and career from childhood through his two terms in the White House. From childhood to college, state government to the executive branch, Bennett provides a concise and readable biography that places Clinton's achievements, problems, and legacy in historical context. Situating the former president in the trajectory of 20th century liberalism, Bennett draws on Clinton's life to illuminate the political landscape of America in the 1990s and the role of the U.S. in the global context of the post-Cold War world. Combining keen scholarship with accessible prose, this will be an essential resource for students and all those interested in

understanding the recent history of the U.S.

This book details the forum that was held by the National Materials Advisory Board at the National Academy of Sciences. The purpose of this forum was to bring the importance of materials to the attention of policy makers and to promote interactions between policy makers and the materials community. Four key themes were addressed: the critical role of materials in advancing technology and enhancing the nation's economy, security, and health, industrial and societal needs that will require materials development in the new millennium. Materials research areas with the greatest potential for meeting those needs, and federal and industrial research initiatives that can help the materials community meet those needs. To help focus this discussion, special sessions were convened to address the current and future roles of materials in four selected areas: information technology, health and biotechnology, national security, and energy and the environment.

Nearly two decades into the new millennium, Latin American documentary film is experiencing renewed vibrancy and visibility on the global stage. While elements of the combative, politicized cinema of the 1960s and 1970s remain, the region's production has become increasingly subjective, reflexive, and experimental, though perhaps no less political. At the same time, Latin American filmmakers both respond to and shape global tendencies in the genre. This book highlights the richness and heterogeneity of Latin American documentary film, surveys a broad range of national contexts, styles, and practices, and expands current debates on the genre. Thematic sections address the "subjective turn" of the 1990s and 2000s and the move beyond it; the ethics of the encounter between the filmmaker and the subject/object of his or her gaze; and the performance of truth and memory, a particularly

urgent topic as Latin American countries have transitioned from dictatorship to democracy.

Beginning in the 1990s, the geography of Latino migration to and within the United States started to shift. Immigrants from Central and South America increasingly bypassed the traditional gateway cities to settle in small cities, towns, and rural areas throughout the nation, particularly in the South. One popular new destination—Nashville, Tennessee—saw its Hispanic population increase by over 400 percent between 1990 and 2000. Nashville, like many other such new immigrant destinations, had little to no history of incorporating immigrants into local life. How did Nashville, as a city and society, respond to immigrant settlement? How did Latino immigrants come to understand their place in Nashville in the midst of this remarkable demographic change? In *Nashville in the New Millennium*, geographer Jamie Winders offers one of the first extended studies of the cultural, racial, and institutional politics of immigrant incorporation in a new urban destination. Moving from schools to neighborhoods to Nashville's wider civic institutions, *Nashville in the New Millennium* details how Nashville's long-term residents and its new immigrants experienced daily life as it transformed into a multicultural city with a new cosmopolitanism. Using an impressive array of methods, including archival work, interviews, and participant observation, Winders offers a fine-grained analysis of the importance of historical context, collective memories and shared social spaces in the process of immigrant incorporation. Lacking a shared memory of immigrant settlement, Nashville's long-term residents turned to local history to explain and interpret a new Latino presence. A site where Latino day laborers gathered, for example, became a flashpoint in Nashville's politics of immigration in part because the area had once been a popular gathering place for area teenagers in the 1960s and 1970s. Teachers also drew from local historical memories, particularly the bus era, to make sense of their newly

multicultural student body. They struggled, however, to help immigrant students relate to the region ' s complicated racial past, especially during history lessons on the Jim Crow era and the Civil Rights movement. When Winders turns to life in Nashville ' s neighborhoods, she finds that many Latino immigrants opted to be quiet in public, partly in response to negative stereotypes of Hispanics across Nashville. Long-term residents, however, viewed this silence as evidence of a failure to adapt to local norms of being neighborly. Filled with voices from both long-term residents and Latino immigrants, Nashville in the New Millennium offers an intimate portrait of the changing geography of immigrant settlement in America. It provides a comprehensive picture of Latino migration ' s impact on race relations in the country and is an especially valuable contribution to the study of race and ethnicity in the South.

Russia's Economic Transitions examines the three major transformations that the country underwent from the early 1860s to 2000. The first transition, under Tsarism, involved the partial break-up of the feudal framework of land ownership and the move toward capitalist relations. The second, following the Communist revolution of 1917, brought to power a system of state ownership and administration - a sui generis type of war-economy state capitalism - subjecting the economy's development to central commands. The third, started in the early 1990s and still unfolding, is aiming at reshaping the inherited economic fabric on the basis of private ownership. The three transitions originated within different settings, but with a similar primary goal, namely the changing of the economy's ownership pattern in the hopes of providing a better basis for subsequent development. The treatment's originality, impartiality and historical breadth have cogent economic, social and political relevance.

rapidly and radically as a result. In this major new study of the contemporary film industry, leading film historian Tino Balio explores the impact of the Internet, declining DVD sales and changing consumer spending habits on the way Hollywood conducts its business. Today, the major studios play an insignificant role in the bottom lines of their conglomerate parents and have fled to safety, relying on big-budget tentpoles, franchises and family films to reach their target audiences. Comprehensive, compelling and filled with engaging case studies (TimeWarner, DreamWorks SKG, Spider Man, The Lord of the Rings, IMAX, Netflix, Miramax, Sony Pictures Classics, Lionsgate and Sundance), *Hollywood in the New Millennium* is a must-read for all students of film studies, cinema studies, media studies, communication studies, and radio and television.

The author illuminates the process of "Latinization" currently underway in the U.S., tracing the largest migration in the history of the Americas--the movement north of large numbers of people from Latin America. Simultaneous. (Social Science)

Investigating the complex interrelations between culture and politics in a wide range of social movements in Latin America, this book focuses on the cultural politics enacted by social movements as they struggle for new visions and practices of citizenship, democracy, social relations, and development.
