A history of the early development of the Greek civilization includes discussions of poetry, sculpture, democracy and vase painting

A collection of ancient literary evidence relating to Greek sculpture, painting, architecture, and the decorative arts.

This richly illustrated, four-colour textbook introduces the art and archaeology of ancient Greece, from the Bronze Age through to the Roman conquest. Suitable for students with no prior knowledge of ancient art, this textbook reviews the main objects and monuments of the ancient Greek world, emphasizing the context and function of these artefacts in their particular place and time. Students are led to a rich understanding of how objects were meant to be perceived, what 'messages' they transmitted and how the surrounding environment shaped their meaning. The book contains nearly five hundred illustrations (with over four hundred in colour), including specially commissioned photographs, maps, floorplans and reconstructions. Judith M. Barringer examines a variety of media, including marble and bronze sculpture, public and domestic architecture, painted vases, coins, mosaics, terracotta figurines, reliefs, jewellery and wall paintings. Numerous text boxes, chapter summaries and timelines, complemented by a detailed glossary, support student learning.

This new and richly illustrated overview of Greek painting combines a fresh scholarly approach to visual arts with the most complete survey to date of the painted monuments of classical antiquity. The Art of Painting in Ancient Greece covers a wide chronological and geographical span, from the Bronze Age murals of Knossos, Santorini and Mycenae to the opulent villas of the Roman Empire, from Anatolia and Egypt in the East to Campania and Etruria in the West. Surveying the techniques, materials, and works produced, as well as ancient literary accounts, the book engages in five main lines of inquiry: Why did the Greeks cover the walls of their sanctuaries, agoras, palaces, homes, and even their tombs with painted images? What topics, real or imaginary, did they choose to depict? How were those images created? What were the techniques employed and the materials used? Who painted those images? And how does the spectacular phenomenon of Greek monumental painting compare with other branches of Greek art, from mosaics and vase painting to sculpture?

Art and religion are both well-attested and much-studied aspects of ancient Greek life, yet their relationship is not perfectly understood. Religion in the Art of Archaic and Classical Greece presents an important rethinking of these two categories. The book examines not only how and where religious activity is presented visually at particular moments and in certain forms, but also what objects and images can tell us about the experiences and impressions of Greek religion. Through an exploration of portable or relatively small-scale art forms--vases, figurines, gems, plaques--Tyler Jo Smith focuses on the visual and material evidence for religious life and customs in Archaic and Classical Greece (sixth to fourth centuries BC). The book introduces its readers to categories of religious practice (e.g., sacrifices, votive offerings, funerals), to the pertinent artistic evidence for them, and to a range of scholarly approaches. Smith combines the study of iconography and the examination of material objects with theoretical perspectives on ritual and performance. When given visual form, religion holds much in common with other ancient Greek modes of artistic expression, including dance and drama. Religion is viewed here as a dynamic performative act, as an expression of connectivity, and as a mechanism of communication. While the complexities of Greek religion cannot be discerned through the visual or material record alone, Religion in the Art of Archaic and Classical Greece frames a more nuanced reading of the artistic evidence than has been previously available. Richly illustrated with 245 halftones and seventeen color plates of mostly small-scale objects, the book is much more than a gathering of images and information in a single place. Taken as a whole, it argues for a visual and material tradition that is intended to express the ritualized practices and shared attitudes of religious life, a story that large public works alone are simply never going to tell.

An inquiry into the foundations of European culture. The account ranges from the Greek Dark Ages to the Christianisation of Rome, revealing how the experience of a constantly changing physical environment influenced the inhabitants of Ancient Greece and Rome.

'The book is part of a series of introductory studies intended to bring the latest developments in art history to students and general readers. But it offers something new to the specialist reader too [...] the quantity of illustrations is impressive for such a slim and inexpensive book ...Classical Art is illuminating, playful, provocative, and often (literally) iconoclastic' -Times Higher Education Supplement
