Bitcoin is a global phenomenon that has taken over the globe. Funny Money is no longer a laughing matter. After years in the background the founders and visionaries emerge with a team of stellar innovators to set the record straight about the past and the future. Satoshi Nakamoto the visionary team shows us why there can only be one truth in time which is immutable. Knowing they could trust no one around them, they left their identification mark on the actual code itself to be retrieved as Id when they returned. They stunned the world to show the power of a decentralized system in real time. Like the Voynich code Satoshi Nakamoto and the team around them seek to preserve their legacy in plain view. See if you can find the secrets they leave behind in many forms. Follow the journey from the beginning and see how much went into creating a platform designed with the guidance of nature itself is surpassing modern technology to create an amazing future. Data embedded in the past becomes immutable in the future when retrieved and the keys of decryption display the message left by those who encrypted it. If we claim to be cryptographers and do not have anything encrypted it seems we are not worthy of the name. In the future our generations will look back at those who fought to hold on to the old ways as barbaric. Once we used an outhouse and today we have a modern sanitary system that has cut down many diseases; this is how we view the system we built to clean up the corruption in a system that could not regulate itself. Onward.

Does the Bible predict an asteroid...or something else? This book will challenge your interpretation of

end-times theology and help you sharpen your understanding in light of current times. Does Revelation 8:10-11 describe an asteroid? Is the Wormwood star from Revelation 8 already headed toward Earth? Are NASA and high-level government officials aware of an asteroid that is on a collision course with our planet? Is that why President Trump sanctioned a colossal increase to planetary defense? Do the prophecies from ancient cultures and religions across the globe all point to a catastrophic planetary event that has scientists and politicians taking extreme preventative measures under the public radar? Earth is not currently prepared for the scope of impact that may be just around the corner, and people in high places know it... But what will the biblical Wormwood actually be? Traditional scholarly interpretation claims it will be an asteroid. Others postulate that the eschatological poisoning of one-third of all Earth's waters and the devastation of our planet's ecology might not be as detectable as we may believe: it could hit suddenly and without warning, like an angel of God appearing in the sky with fire and light, bringing judgment in an instant. Follow Thomas Horn as he blazes a trail through these questions and many others, posing answers that very few in the church today are willing to provide. **FEATURES AND BENEFITS:** Examines asteroid threats to Earth, including Apophis (named after the Egyptian god of chaos), which is a topic of serious discussion among experts in planetary defense Includes interviews with government impact specialists, scientists, Bible scholars, and prophecy experts
