What makes an effective executive? The measure of the executive, Peter F. Drucker reminds us, is the ability to "get the right things done." This usually involves doing what other people have overlooked as well as avoiding what is unproductive. Intelligence, imagination, and knowledge may all be wasted in an executive job without the acquired habits of mind that mold them into results. Drucker identifies five practices essential to business effectiveness that can, and must, be learned: Managing time Choosing what to contribute to the organization Knowing where and how to mobilize strength for best effect Setting the right priorities Knitting all of them together with effective decision-making Ranging widely through the annals of business and government, Peter F. Drucker demonstrates the distinctive skill of the executive and offers fresh insights into old and seemingly obvious business situations.

The measure of the executive, Peter Drucker reminds us, is the ability to 'get the right things done'. Usually this involves doing what other people have overlooked, as well as avoiding what is unproductive. He identifies five talents as essential to effectiveness, and these can be learned; in fact, they must be learned just as scales must be mastered by every piano student regardless of his natural gifts. Intelligence, imagination and knowledge may all be wasted in an executive job without the acquired habits of mind that convert these into results. One of the talents is the management of time. Another is choosing what to contribute to the particular organization. A third is knowing where and how to apply your strength to best effect. Fourth is setting up the right priorities. And all of them must be knitted together by effective decision-making. How these can be developed forms the main body of the book. The author ranges widely through the annals of business and government to demonstrate the distinctive skill of the executive. He turns familiar experience upside down to see it in new perspective. The book is full of surprises, with its fresh insights into old and seemingly trite situations.

In his sixty-five-year consulting career, Peter F. Drucker, widely regarded as the father of modern management, identified eight practices that can make any executive effective. Leadership is not about charisma or extroversion. It's about these practices: Effective executives ask, "What needs to be done?" They also ask, "What is right for the enterprise?" They develop action plans. They take responsibility for decisions. They take responsibility for communicating. They focus on opportunities rather than problems. They run productive meetings. And they think and say "we" rather than "I." Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

How can management be developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers. With a new foreword by Joseph Maciariello

Managing in Turbulent Times tackles the key issues facing managers in the 1990s: how to manage in rapidly changing environments. This seminal and prophetic book laid the foundation for a generation of writers on change management. This book concerns the immediate future of business, society and the economy. The one certainty about the times ahead, says Drucker, is that they will be turbulent times. In turbulent times the first task of management is to make sure of the organizations capacity for survival, to make sure of its structural strength and soundness, its capacity to survive a blow, to adapt to sudden change and to avail itself of new opportunities. The author is concerned with action rather than understanding, with decisions rather than analysis. It aims at being a practical book for the decision maker, whether in the private or the public sector.

We live in an age of unprecedented opportunity: with ambition, drive, and talent, you can rise to the top of your chosen profession regardless of where you started out. But with opportunity comes responsibility. Companies today aren't managing their knowledge workers careers. Instead, you must be your own chief executive officer. That means it's up to you to carve out your place in the world and know when to change course. And it's up to you to keep yourself engaged and productive during a career that may span some 50 years. In *Managing Oneself*, Peter Drucker explains how to do it. The keys: Cultivate a deep understanding of yourself by identifying your most valuable strengths and most dangerous weaknesses; Articulate how you learn and work with others and what your most deeply held values are; and Describe the type of work environment where you can make the greatest contribution. Only when you operate with a combination of your strengths and self-knowledge can you achieve true and lasting excellence. *Managing Oneself* identifies the probing questions you need to ask to gain the insights essential for taking charge of your career. Peter Drucker was a writer, teacher, and consultant. His 34 books have been published in more than 70 languages. He founded the Peter F. Drucker Foundation for Nonprofit Management, and counseled 13 governments, public services institutions, and major corporations.

A *How-To Guide for the Modern Leader* Inspired by Peter Drucker's groundbreaking book *The Effective Executive*, Laura Stack details precisely how 21st-century leaders and managers can obtain profitable, productive results by managing the intersection of two critical values: effectiveness and efficiency. Effectiveness, Stack says, is identifying and achieving the best objectives for your organization—doing the right things. Efficiency is accomplishing them with the least amount of time, effort, and cost—doing things right. If you're not clear on both, you're wasting your time. As Drucker put it, "There is nothing so useless as doing efficiently that which should not be done at all." Stack's 3T Leadership offers twelve practices that will enable executives to be effective and efficient, grouped into three areas where leaders spend their time: Strategic Thinking, Teamwork, and Tactics. With her expert advice, you'll get scores of new ideas on how you, your team, and your organization can boost productivity.

Post-Capitalist Society provides an analysis of the transformation of the world into a post-capitalist society. This transformation, which will not be completed until 2010 or 2020, has already changed the political, economic, social, and moral landscape of the world. The book reviews and revises the social, economic, and political history of the Age of Capitalism and of the nation state. It argues that the real and controlling resource and the absolutely decisive factor of production is neither capital, nor land, nor labor. It is knowledge. Instead of capitalists and proletarians, the classes of the post-capitalist society are knowledge workers and service workers. This book covers a wide range of topics, dealing with post-capitalist society; with post-capitalist polity; and with new challenges to knowledge itself. The focus is on the developed countries—on Europe, on the United States and Canada, on Japan and the newly developed countries on the mainland of Asia, rather than on the developing countries of the Third World. The areas of discussion—Society, Polity, and Knowledge—are arrayed in order of predictability.

The essential book on management from the man who invented the discipline now completely revised and updated for the first time.

Gain insight into the writings of Peter Drucker, one of management's greatest thinkers, with this digital collection curated by Harvard Business Review. "Managing Oneself," "What Makes an Effective Executive," "The Theory of the Business," "Why Read Peter Drucker," "What Peter Drucker Knew About 2020," and "Clay Christensen on Peter Drucker" will help managers and leaders better understand, and manage, the complex challenges they face in our volatile world.
