About Emperor Qin's Terra Cotta Army | National Geographic
The purpose of the army was likely to act as guardian figures for the tomb or to serve their ruler in the next life. The site was discovered in 1974 CE, and the realistic army figures provide a unique insight into ancient Chinese warfare from weapons to armour or chariot mechanics to command structures. Shi Huangdi was desperate for immortality, and in the end, his terracotta army of over 7000 warriors, 600 horses, and 100 chariots has given him just that, at least in name and deed.

"This catalog accompanies the exhibition Terracotta Army: Legacy of the First Emperor of China, organized by the Virginia Museum of Fine Arts"--

"The terra cotta army of Qin Shihuangdi, the First Emperor of China (r. 221-210 BC), is one of the most spectacular finds in world archaeology. It was discovered by chance in 1974 - a garrison in battle-ready formation, spread across a number of pits. Here were life-sized warriors made over two thousand years ago from fired clay: cavalry, archers, and infantry; lowly foot soldiers and high ranking officers; figures of varying ages, with different hairstyles and facial expressions and seemingly representing every racial group in China - more than 6,000 in all." "But who was this powerful Emperor of the Qin Dynasty who needed such an army to guard him in the afterlife? How were the figures made? How could they have been manufactured on such a vast scale? Beautifully illustrated and based on the latest research, this little book provides a perfect introduction to what has often been described as the eighth Wonder of the World."--BOOK JACKET.

Exciting investigations in northwest China are about to reveal more of the mysteries of the huge mausoleum of the Qin Emperor, a portion of which was accidentally discovered in 1974 by farmers who were digging a well. The second phase of an international research project began in 2011, and more recently, promising new excavations began in Pit 2, with exciting fresh discoveries already announced. The Terracotta Warriors seeks to examine one of China's most famous archaeological discoveries in light of these new findings.The book begins with the discovery of the terracotta warriors and then tells the history of the Qin Dynasty and as much as is known about the construction of the third century BCE mausoleum, based on the work of the historian Sima Qian (145–90 BCE). He wrote that the First Emperor was buried with palaces, towers, officials, valuable artifacts, and wondrous objects. The new findings and the historical description of the mausoleum suggest that the next discoveries may surpass the size and conception of the original discovery of the terracotta warriors. In the second part, Edward Burman questions who built the warriors, how, and what purpose they served. Finally, he anticipates the ongoing discoveries and describes the new methods of excavation and preservation.
