Each day, firefighters throughout the country use numerous tools for extrication, forcible entry, extinguishment, rescue, ventilation, overhaul, salvage, and other functions associated with the "job." Without the knowledge of how and when to use these tools, they become ineffective and a waste of space on the apparatus. Each chapter: * Identifies the tool and its standard uses * Discusses special tool uses and in-house modifications * Points out the limitations of each tool Written for firefighters, company officers, chief officers, and anyone purchasing hand tools for the fire service.

To help stop fires and keep people safe, firefighters use many tools. Young readers will learn about the tools firefighters use to help their communities through carefully leveled text, age-appropriate critical-thinking questions, and vibrant photos.

The Hall of Flame Museum of Firefighting at Fifty documents the history of structural and wild land firefighting in the United States from colonial times through the middle of the 20th century. Illustrated by hundreds of photos depicting the museum's collection of firefighting tools - apparatus, uniforms, auxiliary equipment, fire marks, fire alarm equipment and fire suppression systems. Also included are photographs, lithographs, prints and engravings of other fire related items. A Chapter dedicated to the National Firefighting Hall of Heroes is included. 11" x 8.5" hardbound 200 pages with color dust jacket.

There is so much more that Fire Fighters do that the community at large has no idea about. This ebook is going to give you a slew of information about fire fighters, the different types of fire fighters and much more!

Profiles the characteristics of and qualifications needed for twelve jobs that involve working with nature.

Training is about learning new skills and certifying the ability to perform them to a given standard. Section 1 begins with a one-year outline for training officers. Section 2 follows with a table of listings for each outline given in the book, indicating whether the drill is inside or outside and the preparation time needed for it. Section 3 consists of general guidelines for the training officer on how to conduct drills in a safe but effective manner. Section 4 contains the outlines of the various drills that should be conducted. They can be customized and altered, but the basic concept will provide you with a solid place to start. The safety of the members is paramount. Follow all safety precautions and conduct the drills in accordance with standards and company policies.

Written by firefighters for firefighters. Elevator and Escalator Rescue: A Comprehensive Guidecontains important information for technical rescue members, training officers, and fire company members alike. This engaging and assessable book details the risks involved in elevator and escalator rescues and how to face them successfully.
