This book discusses the return of geopolitical ideas and doctrines to the post-Soviet space with special focus on the new phenomenon of digital geopolitics, which is an overarching term for different political practices including dissemination of geopolitical ideas online, using the internet by political figures and diplomats for legitimation and outreach activity, and viral spread of geopolitical memes. Different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice. Our authors consider new spatial sensibilities and new identities of global as well as local Selves, the emergence of which is facilitated by the internet. They explore recent reconfigurations of the traditional imperial conundrum of center versus periphery. Developing Manuel Castells ' argument that social activism in the digital era is organized around cultural values, the essays discuss new geopolitical ideologies which aim to reinforce Russia ' s spiritual sovereignty as a unique civilization, while at the same time seeking to rebrand Russia as a greater soft power by utilizing the Russian-speaking diaspora or employing traditionalist rhetoric. Great Power imagery, enemy-making, and visual mappings of Russia ' s future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears. In the age of new media, however, this is being done with greater subtlety by mobilizing the grassroots, contracting private information channels, and de-politicizing geopolitics. Given the political events of recent years, it is logical that the Ukrainian crisis should provide the thematic backdrop for most of the authors.

The European Conference on Numerical Mathematics and Advanced Applications (ENUMATH), held every 2 years, provides a forum for discussing recent advances in and aspects of numerical

mathematics and scientific and industrial applications. The previous ENUMATH meetings took place in Paris (1995), Heidelberg (1997), Jyvaskyla (1999), Ischia (2001), Prague (2003), Santiago de Compostela (2005), Graz (2007), Uppsala (2009), Leicester (2011) and Lausanne (2013). This book presents a selection of invited and contributed lectures from the ENUMATH 2015 conference, which was organised by the Institute of Applied Mathematics (IAM), Middle East Technical University, Ankara, Turkey, from September 14 to 18, 2015. It offers an overview of central recent developments in numerical analysis, computational mathematics, and applications in the form of contributions by leading experts in the field.

These proceedings represent the work of researchers presenting at the 16th European Conference on Knowledge Management (ECKM 2015). We are delighted to be hosting ECKM at the University of Udine, Italy on the 3-4 September 2015. The conference will be opened with a keynote from Dr Madelyn Blair from Pelerei Inc., USA on the topic “ The Role of KM in Building Resilience ” . On the afternoon of the first day Dr Daniela Santarelli, from Lundbeck, Italy will deliver a second keynote speech. The second day will be opened by Dr John Dumay from Macquarie University, Sydney, Australia. ECKM is an established platform for academics concerned with current research and for those from the wider community involved in Knowledge Management to present their findings and ideas to peers from the KM and associated fields. ECKM is also a valuable opportunity for face to face interaction with colleagues from similar areas of interests. The conference has a well-established history of helping attendees advance their understanding of how people, organisations, regions and even countries generate and exploit knowledge to achieve a competitive advantage, and drive their innovations forward. The range of issues and mix of approaches followed will ensure an interesting two days. 260 abstracts were initially received for this conference. However, the academic rigor of ECKM means that, after the double blind peer review process there are 102 academic papers, 15 PhD research papers, 1 Masters research papers and 7 Work in Progress papers published in these Conference Proceedings. These papers reflect the continuing interest and diversity in the field of Knowledge Management, and they represent truly global research from many different countries, including Algeria, Austria, Bosnia and Herzegovina, Brazil, Canada, Chile, Colombia, Cuba, Cyprus, Czech Republic, Estonia, Finland, France, France, Germany, Hungary, India, Indonesia, Iran, Ireland, Italy, Japan, Jordan, Kenya, Lithuania, Mexico, Nigeria, Norway, Pakistan, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Sultanate of Oman, Sweden, Switzerland, Thailand, The Netherlands, UK, United Arab Emirates, USA and Venezuela.

The book offers an account of Egypt ’ s legislative achievements and shortcomings in light of its international obligation to eliminate gender discrimination resulting from the Women ’ s Convention and proposes de jure and de facto reforms to improve Egypt ’ s implementation efforts.

This book comprises refereed papers from the 10th World Congress on Engineering Asset Management (WCEAM 2015), held in Tampere, Finland in September 2015. These proceedings include a compilation of state-of-the-art papers covering a comprehensive range of subjects equally relevant to business managers and engineering professionals alike. With a focus on various aspects of engineering asset management ranging from strategic level issues to detail-level machine health issues, these papers address both industry and public sector concerns and issues, as well as advanced academic research. Proceedings of the WCEAM 2015 is an excellent reference and resource for asset management practitioners, researchers and academics, as well as undergraduate and postgraduate students at tertiary institutions or in the industry.

Romani is the first language, and family and community language, of upwards of 3-4 million people and possibly many more in Europe, the Americas, and Australia. Documentation and research on the language draws on a tradition of more than two centuries, yet it remains relatively unknown and often engulfed by myths. In recent decades there has been an upsurge of interest in the language including language maintenance and educational projects, the creation of digital resources, language policy initiatives, and a flourishing community of online users of the language. This Handbook presents state of the art research on Romani language and linguistics. Bringing together key established scholars in the field of linguistics and neighbouring disciplines, it introduces the reader to the structures of Romani and its dialect divisions, and to the history of research on the language. It then goes on to explore major external influences on the language through contact with other key languages, aspects of language acquisition, and interventions in support of the language through public policy provisions, activism, translation, religious and literary initiatives, and social media. This comprehensive and groundbreaking account of Romani will appeal to students and scholars from across language and linguistics.
