Each chapter of Chord Progressions For Songwriters provides a comprehensive self-contained lesson on one of twenty-one popular chord progressions that every songwriter should know inside and out. Lessons cover ascending, basic (I-IV), blues, circle (VI-II-V-I), classic rock (I-bVII-IV), combination, descending, doo-wop (I-VIm-IV-V), ending, flamenco (Im-bVII-bVI-V), folk (I-V), introduction, jazz (IIIm-V-I), minor blues, one-chord, pedal point, rock and roll (I-IV-V), standard (I-VIm-IIIm-V), and turnaround progressions as well as rhythm and Coltrane changes. You will learn how key, duration, substitution, variation (adding or subtracting chords), and displacement (rearranged chord orders) are used to vary the sound of each progression. You will also take a look at the author's songwriter's notebook and work through exercises to reinforce key chapter concepts and get you started building your own progressions.

Every Haynes manual is based on a complete teardown and rebuild, contains hundreds of "hands-on" photos tied to step-by-step instructions, and is thorough enough to help anyone from a do-it-your-selfer to a professional.
