Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Traces the history of the Volkswagen Beetle, from its first introduction as a Nazi propaganda tool and its postwar status as a countercultural icon to its successful revision in 1998.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, "fess up."

Gentile reader, and you, Jews, come too. Follow Sue William Silverman, a one-woman cultural mash-up, on her exploration of identity among the mishmash of American idols and ideals that confuse most of us--or should. Pat Boone is our first stop. Now a Tea Party darling, Boone once shone as a squeaky-clean pop music icon of normality, an antidote for Silverman's own confusing and dangerous home, where being a Jew in a Christian school wasn't easy, and being the daughter of the Anti-Boone was unspeakable. And yet somehow Silverman found her way, a "gefilte fish swimming upstream," and found her voice, which in this searching, bracing, hilarious, and moving book tries to make sense of that most troubling American condition: belonging, but to what? Picking apricots on a kibbutz, tramping cross-country in a loathed Volkswagen camper, appearing in a made-for-television version of her own life: Silverman is a bobby-soxer, a baby boomer, a hippy, a lefty, and a rebel with something to say to those of us--most of us--still wondering what to make of ourselves.

Harness the Latest Tools and Techniques for Troubleshooting and Repairing Virtually Any Diesel Engine Problem The Fourth Edition of Troubleshooting and Repairing Diesel Engines presents the latest advances in diesel technology. Comprehensive and practical, this revised classic equips you with all of the state-of-the-art tools and techniques needed to keep diesel engines running in top condition.
