Picking up on this same theme in his 2019 inaugural(!) lecture Martin Weller says “ The story we tell the world about ourselves isn ’ t a luxury ” when reflecting on 15 years of digital innovation in edtech at the OU. In all our conversations about disruption, innovation and change, I increasingly think we ’ ve been sold a lie.

Mr Ellwood told the Commons: “ When it comes to re-establishing greater Western resolve, 2021 could be a big year for the United Kingdom as we host Cop26 and we take on the presidency of the G7.

An around-the-world journey to discover where in the wild we can find the elements of life and the surprising ways they ’ re essential to our survival We all know that we depend on elements for survival—from the oxygen in the air we breathe to the carbon in the molecular structures of all living things. But we don ’ t often stop to appreciate how, say, phosphorous holds our DNA together or how potassium powers our optic nerves so that we can see. In *The Elements We Live By*, physicist and award-winning author Anja Røyne takes us on an astonishing journey through chemistry and physics, introducing the building blocks from which we humans—and the world—are made. Not only does Røyne explain why our bodies need iron, phosphorus, silicon, potassium, and many more elements in just the right amounts in order to function, she also leads us around the world to where these precious elements are found (some of them in ever-shrinking quantities). You ’ ll understand how precariously balanced our lives—and ways of life—really are, and you ’ ll see these unsung heroes of the

periodic table in an entirely new light.

Illustrations and simple rhyming text show that while the body parts of various human and Muppet characters may look different, they have similar uses.--

The sudden death of his wife pushes Alex Hemmer, a young neuroscience researcher, to press ahead with his attempts to relive past events. In a startling breakthrough, he synthesises a bacterial toxin that is a bona fide memory drug. By administering the substance in conjunction with electric needling of key areas of the brain, test subjects are able to relive past events. Besides the enormous benefits to mankind, the implications of this research for Alex himself are obvious-it is now possible for him to return to the life he thought lost forever and spend his future living and loving Laura. While Alex ponders the possibilities, shadowy forces have been at work infiltrating the project with the aim of taking over his research. To add to his problems, Alex has fallen in love with Abbey, his colleague and Laura's best friend.

Everyone believes something. But how and why do people believe? What counts as evidence? How much can be assumed or believed by faith alone? When it comes to religious faith, the questions become at once more difficult and more important. Over the centuries, Christians have offered different approaches to explaining or defending the Christian faith, a discipline known as apologetics. But it has not always been clear how different apologetic methods work, or what each approach has to offer. In this comprehensive survey, Brian Morley provides an overview of Christian apologetic approaches and how they differ. He explores the historical and philosophical underpinnings of key figures and major schools of thought, from the presuppositionalism of Cornelius Van Til to the evidentialism of Gary Habermas. Moving beyond theory, Morley also covers apologetic application, demonstrating how each view works out in practical terms. This guide covers the complexities of apologetics in a way that is accessible to the nonspecialist. Even-handed and respectful of each apologist and their contribution, this book provides the reader with a formidable array of defenses for the faith.

In 2009, Rachael Cerrotti, a college student pursuing a career in photojournalism, asked her grandmother, Hana, if she could record her story. Rachael knew that her grandmother was a Holocaust survivor and the only one in her family alive at the end of the war. Rachael also knew that she survived because of the kindness of strangers. It wasn't a secret. Hana spoke about her history publicly and regularly. But, Rachael wanted to document it as only a granddaughter could. So, that's what they did: Hana talked and Rachael wrote. Upon Hana's passing in 2010, Rachael discovered an incredible archive of her life. There were preserved albums and hundreds of photographs dating back to the 1920s. There were letters waiting to be translated, journals, diaries, deportation and immigration papers as well as creative writings from various stages of Hana's life. Rachael digitized and organized it all, plucking it from the past and placing it into her present. Then, she began retracing her grandmother's story, following her through Central Europe, Scandinavia, and across the United States. She tracked down the descendants of those who helped save her grandmother's life during the war. Rachael went in pursuit of her grandmother's memory to explore how the retelling of family stories becomes the history itself. *We Share the Same Sky* weaves together the stories of these two young women—Hana as a refugee who remains one step ahead of the Nazis at every turn, and Rachael, whose insatiable curiosity to touch the

past guides her into the lives of countless strangers, bringing her love and tragic loss. Throughout the course of her twenties, Hana ' s history becomes a guidebook for Rachael in how to live a life empowered by grief.

Hans Küng has been a major influence on post-war Christianity by any reckoning. a peritus for the second Vatican council, he then went on to publish a number of controversial books, including *Infallible? An Enquiry* (1971), which enraged the Vatican and caused him to lose the ecclesiastical approval of his teaching at the university of Tübingen. However, he remains a respected priest in good standing with his bishop. Throughout all the upheavals that the Catholic Church has undergone in recent decades, Küng has been an outspoken observer, turning himself from enfant terrible to bête noire. However his world influence has been great. Whether speaking at the United Nations or consorting with politicians and religious leaders, he is always listened to with respect and enthusiasm. A string of recent books has added to his reputation-notably *On Being a Christian* (1974) and *Does God Exist? An Answer for Today* (1980) What is not so well known is that, as a young man, Küng was a close friend and confidant of Joseph Ratzinger (Benedict XVI). Over the years, however, they increasingly came to represent exactly what the other most despised. On being appointed to the Holy See, Ratzinger had a long private meeting with Küng , the consequences of which may resonate within the Catholic Church for many years. In these thrilling memoirs Küng gives his personal account of all these struggles and ambitions. The result is a book of major importance for any student of the church in the 20th century. This second volume covers the period following the close of the Second Vatican Council right up to the present day.
