The direction of the plane through which the section is cut is often represented on plan drawings and elevations by a line of long and short dashes, called a section plane. If there are a number of sections, the line may have letters at each end indicating the name of the section drawing and an arrow showing the direction that the view takes.

No - there is a legal requirement to keep the sections of the EHC plan separate so that it is clear what needs and provision are in what section. LAs are only legally required to secure the special educational provision set out in Section F so if this is unclear, or put into the wrong section, then the child or young person may not receive the special educational provision they need.

In U.S. land surveying under the Public Land Survey System, a section is an area nominally one square mile, containing 640 acres, with 36 sections making up one survey township on a rectangular grid. The legal description of a tract of land under the PLSS includes the name of the state, name of the county, township number, range number, section number, and portion of a section. Sections are customarily surveyed into smaller squares by repeated halving and quartering. A quarter section is 160 acr

A caesarean section, or C-section, is an operation to deliver your baby through a cut made in your tummy and womb. The cut is usually made across your tummy, just below your bikini line. A caesarean is a major operation that carries a number of risks, so it's usually only done if it's the safest option for you and your baby.

In mathematics, a conic section (or simply conic) is a curve obtained as the intersection of the surface of a cone with a plane. The three types of conic section are the hyperbola, the parabola, and the ellipse; the circle is a special case of the ellipse, though historically it was sometimes called a fourth type. The ancient Greek mathematicians studied conic sections, culminating around 200 ...
