The Extent of the Literal develops a strikingly new approach to metaphor and polysemy in their relation to the conceptual structure. In a straightforward narrative style, the author argues for a reconsideration of standard assumptions concerning the notion of literal meaning and its relation to conceptual structure. She draws on neurophysiological and psychological experimental data in support of a view in which polysemy belongs to the level of words but not to the level of concepts, and thus challenges some seminal work on metaphor and polysemy within cognitive

linguistics, lexical semantics and analytical philosophy.

The papers in this volume deal with the issue of how corpus data relate to the questions that cognitive linguists have typically investigated with respect to conceptual mappings. The authors in this volume investigate a wide range of issues - the coherence and function of particular metaphorical models, the interaction of form and meaning, the identification of source domains of metaphorical expressions, the relationship between metaphor and discourse, the

priming of metaphors, and the historical development of metaphors. The studies deal with a variety of metaphorical and metonymic source and target domains, including the source domains SPACE, ANIMALS, BODY PARTS, ORGANIZATIONS and WAR, and the target domains VERBAL ACTIVITY, ECONOMY, EMOTIONS and POLITICS. In their studies, the authors present a variety of corpus-linguistic methods for the investigation of conceptual mappings, for example, corpora annotated for semantic categories, concordances of individual source-domain items and patterns, and concordances

of target-domain items. In sum, the papers in this volume show how a wide range of corpus-linguistic methods can be used to investigate a variety of issues in cognitive linguistics; the combination of corpus methods with a cognitive-linguistic view of metaphor and metonymy yields new answers to old questions (and to new questions) about the relationship between language as a conceptual phenomenon and language as a textual phenomenon.

Metaphors in audiovisual media receive increasing attention from film and communication studies as

well as from linguistics and multimodal metaphor research. The specific media character of film, and thus of cinematic metaphor, remains, however, largely ignored. Audiovisual images are all too frequently understood as iconic representations and material carriers of information. Cinematic Metaphor proposes an alternative: starting from film images as affective experience of movement-images, it replaces the cognitive idea of viewers as information-processing machines, and heals the break with rhetoric established by conceptual metaphor theory.

Subscribing to a phenomenological concept of embodiment, a shared vantage point for metaphorical meaning-making in film-viewing and face-to-face interaction is developed. The book offers a critique of cognitive film and metaphor theories and a theory of cinematic metaphor as performative action of meaning-making, grounded in the dynamics of viewers' embodied experiences with a film. Fine-grained case studies ranging from Hollywood to German feature film and TV news, from tango lesson to electoral campaign commercial, illustrate the framework's application to

The most useful and available key to someone's position lies in the expressions he is prepared to make his own. Language clearly reflects the bearings we have taken as well as it reveals how aware we are that we have taken them. The language he uses not only shows us where someone stands but also lets us in on the extent to which he understands where he stands. And if the expressions we are prepared to utter are so revealing about our position in the world, perhaps the language

we use can also reveal some basic facts about the world itself--or the world as we most basically see it.

Language would then prove a valuable key to that style of question long called metaphysical. This book is an attempt to follow out some of the clues that language gives us about the world, specifically those offered by a privileged set of expressions: analogous terms.

"The authors restore metaphor to our lives by showing us that it's never gone away. We've merely been taught to talk as if it had: as though weather maps were

more 'real' than the breath of autumn; as though, for that matter, Reason was really 'cool.' What we're saying whenever we say is a theme this book illumines for anyone attentive." – Hugh Kenner, Johns Hopkins University "In this bold and powerful book, Lakoff and Turner continue their use of metaphor to show how our minds get hold of the world. They have achieved nothing less than a postmodern Understanding Poetry, a new way of reading and teaching that makes poetry again important." – Norman Holland, University of Florida

What counts as health or ill health? How do we deal with the fallibility of our own bodies? Should illness and disease be considered simply in biological terms, or should considerations of its emotional impact dictate our treatment of it? Our understanding of health and illness had become increasingly more complex in the modern world, as we are able to use medicine not only to fight disease but to control other aspects of our bodies, whether mood, blood pressure, or cholesterol. This collection of essays foregrounds the concepts of health and illness and patient experience within

the philosophy of medicine, reflecting on the relationship between the ill person and society. Mental illness is considered alongside physical disease, and the important ramifications of society's differentiation between the two are brought to light. Health, Illness and Disease is a significant contribution to shaping the parameters of the evolving field of philosophy of medicine and will be of interest to medical practitioners and policy-makers as well as philosophers of science and ethicists.

Organization, revolutionized the field of organization theory. In honor of Morgan's classic text, this edited volume, *Exploring Morgan's Metaphors: Theory, Research, and Practice in Organizational Studies* (by Anders Örténblad, Kiran Trehan, and Linda L. Putnam), illustrates how Morgan's eight metaphors inform research, practice, and organizational intervention in a variety of contexts. Including contributions from well-known experts in their fields, specifically, Joep Cornelisen, Cliff Oswick, David Grant, and Gareth Morgan, this new text offers

fresh perspectives and sets forth new metaphors for conceptualizing organizations in today's workforce. Readers will gain insights and guidelines into the different ways that Morgan's metaphors and metaphorical thinking can be used to better understand organizational life, as well as how to study and develop organizations.
