This is the catalog of an exhibition held at the Museum of Modern Art, New York, and a study of Lichtenstein's work from all phases of his career. It covers the work of 25 years, beginning with 1901 when the famous Benday dots first appeared in the pop images derived from advertisements and bubblegum comics to the 1985 sketches and working drawings for the Equitable Center murals. Rose presents a history of the artist's career, analyzes his techniques and workmanship, and also addresses such topics as the relationship between traditional art and mass communications and the role of parody. ISBN 0-87070-416-8: \$37.50 (For use only in the library).

ex-President of a Caribbean country, only to discover that his political ambition is very much intact. In these twelve masterly stories about the lives of Latin Americans in Europe, García Márquez conveys the peculiar amalgam of melancholy, tenacity, sorrow, and aspiration that is the émigré experience.

The first collection of critical essays on May Swenson and her literary universe, *Body My House* initiates an academic conversation about an unquestionably major poet of the middle and late twentieth century. Between the 1950s and the 1980s, May Swenson produced eleven volumes of poetry, received many major awards, was elected chancellor of the Academy of American Poets, and was acclaimed by writers in virtually every school of American poetry. Essays here address the breadth of Swenson's literary corpus and offer varied scholarly approaches to it. They reference Swenson manuscripts---poems, letters, diaries, and other prose---some of which have not been widely available before. Chapters focus on Swenson's work as a nature writer; the literary and social contexts of her writing; her national and international acclaim; her work as a translator; associations with other poets and writers (Bishop, Moore, and others); her creative process; and her profound explorations of gender and sexuality. The first full volume of scholarship on May Swenson, *Body My House* suggest an ambitious agenda for further work. Contributors include Mark Doty, Gudrun Grabher, Cynthia Hogue, Suzann Juhasz, R.R. Knudson, Alicia Ostriker, Martha Nell Smith, Michael Spooner, Paul Swenson, and Kirstin Hotelling Zona.

Tropical forests are an undervalued asset in meeting the greatest global challenges of our time--averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. *Why Forests? Why Now?* synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

This volume offers a synthesis of what is known about very large and very small common-pool resources. Individuals using commons at the global or local level may find themselves in a similar situation. At an international level, states cannot appeal to authoritative hierarchies to enforce agreements they make to cooperate with one another. In some small-scale settings, participants may be just as helpless in calling on distant public officials to monitor and enforce their agreements. Scholars have independently discovered self-organizing regimes which rely on implicit or explicit principles, norms, rules and procedures rather than the command and control of a central authority. The contributors discuss the possibilities and dangers of scaling up and scaling down. They explore the impact of the number of actors and the degree of heterogeneity among actors on the likelihood of cooperative behaviour.

The first in-depth study of the savings and loan crisis of the eighties reveals the unprecedented scope of the financial fraud and political collusion involved and the leniency of the criminal justice system in dealing with the culprits. UP.
